EDUCATION

Rochester Institute of Technology, *Ph.D. Imaging Science*   *August 2015 - August 2022*
Thesis: Learning Representations in the hyperspectral domain in aerial imagery
Advisors: Dr. Matthew Hoffman, Dr. Christopher Kanan, Dr. Emmett Ientilucci

Rochester Institute of Technology, *M.S. Electrical Engineering*   *August 2013 - August 2015*
Advisor: Dr. Eli Saber

EXPERIENCE

Memorial Sloan Kettering Cancer Center, *Research Fellow*   *August 2022 – Present*
- Curated large-scale clinical imaging datasets and developed self-supervised pretraining pipelines for 2D and 3D transformer-based architectures on the team led by Dr. Harini Veeraraghavan
- Development of classification and segmentation models across multiple cancer types using standalone and multimodal vision-language architectures; collaborated closely with radiation oncologists, medical physicists, and neuro-oncologists to align models with clinical workflows
- Led development of out-of-distribution detection and sparsity formulation techniques for safe and efficient clinical deployment of our methods to medical data collected by other hospitals
- Students mentored: Jorge T Gomez, Nishant Nadkarni, Shiqin Tan

SRI International, *Research Intern*   *Summer 2018*
- Modified and fine-tuned Faster RCNN object detection pipeline for infrared imagery under limited data constraints
- Designed continual self-supervised approaches for object counting in aerial imagery with efficient data labeling

Conduent Labs, *Software Research Intern*   *Summer 2017*
- Built GAN-based models with categorical conditioning to enhance synthetic vehicle occupancy imagery to improve automated passenger counting at toll booths

Rochester Institute of Technology, *Graduate Research Assistant*   *May 2016 - August 2022*
- Curated large-scale hyperspectral remote sensing datasets and designed self-supervised learning algorithms to extract meaningful representations for labeled data fine-tuning
- Developed semi-supervised learning frameworks for enhancing segmentation accuracy in natural and remote sensing imagery
- Students mentored: Henry Ye, Varun Mondaiyka, Parikshit Shembekar

Hewlett Packard, *Software Engineering Intern*   *Summer 2015*
- Developed demosaicing algorithms for improved color scanning speeds with trade-off efficiency [US Patent App]
